Meet our Experts. As leaders in our field, our global reputation is based on the reliability of hydrographic and geospacial information, sourced and compiled by experts. Tide tables and solunar charts for Washington: high tides and low tides; sun and moon rising and setting times, lunar phase, fish activity and weather conditions in Washington. Tides are the rise and fall of sea levels caused by the combined effects of the gravitational forces exerted by the Moon and the Sun, and the rotation of the Earth.. Tide tables can be used for any given locale to find the predicted times and amplitude (or "tidal range"). The predictions are influenced by many factors including the alignment of the Sun and Moon, the phase and amplitude of the ...
