Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation. A. Be Sure that the backstop is adequate. B. RIFLES: Be aware that the bullet line of travel will be as much as two inches BELOW the line of sight on scope-sighted rifles. Adjust upward in order NOT to hit the Chrony. If a bullet hits the Chrony, the Chrony will be destroyed, and will endanger you and others because of bullet ricochet and flying parts of the Chrony.
