

Download Land Rover 101 User Manual

The 101 was produced between 1975 and 1978 although many vehicles were stored for long periods and others were refurbished at later dates. The Land-Rover 101 uses the 3.5-litre alloy V8 and LT95 transmission from the Range Rover. This gives a 4-speed gearbox × 2-speed transfer case, and full-time 4WD. The Land Rover series I, II, and III (commonly referred to as series Land Rovers, to distinguish them from later models) are off-road vehicles produced by the British manufacturer Rover Company. The Land Rover was the first mass-produced civilian four-wheel drive car with doors on it. In 1992, Land Rover claimed that 70% of all the vehicles they had built were still in use. Land Rover.
