

# Download Rice Production And Marketing In Nigeria

The specific objectives of the present study are: 1. to characterize rice production in Nigeria in terms of producers, production and utilization practices; 2. to analyze the competitiveness of Nigerian rice production systems; 3. to provide the basis for the development of a strategy to revitalize the Nigerian rice sector.

**Rice Production in Nigeria: How to Start.** Nigerians consume about 5.5 million tonnes of rice annually, and even though the amount of rice locally produced is 3.6 million tonnes, and the amount imported is 1.9 million tonnes, it's still enough to put Nigeria as one the highest importers of rice in the world.

**Management Team of the Rice Cultivation and Processing Business plan in Nigeria.** He is a graduate of the faculty of Agriculture from the prestigious Obafemi Awolowo University, Ile-Ife. He will be in-charge of day to day activities of the business. –

**Dayo Adetiloye (B Agric, MBA, and PMP):** He has over 12 years' experience in the industry. The development of rice production, marketing, and processing in Eastern Nigeria provides a useful example of the establishment of a new agri- cultural industry in a preindustrial economy. Rice has been grown in the North- ern and Western Regions of Nigeria for centuries, but in the Eastern Region it is a relatively new crop.
